

A readable page

This document is an original test fixture for PdfToEpub converter. The paragraphs on this page should remain adjustable text in the EPUB. Change the reader font size to check that sentences wrap naturally.

The following pages exercise simple tables, merged cells, mathematical notation, vector diagrams, columns, a scanned page, and a slide. This is a controlled sample; real PDFs will have more varied layouts.

What to inspect

Check the order of paragraphs, table rows and columns, equation shapes, diagram labels, and the distinction between image text and adjustable text. No content in this fixture depends on an online service.

A simple table

A reliable grid should become an HTML table. Each value must stay in the correct row and column. The paragraph below the table must follow it in reading order.

Material	Quantity	Unit
Notebook	12	pieces
Pencil	24	pieces
Paper	3	packs
Ink	2	bottles

TABLE_END_MARKER. The table is complete; this paragraph follows all five rows. The EPUB should contain each product name only once.

Merged cells need care

A merged header should keep its original appearance. In the first prototype this table uses a cropped image rather than guessing a grid that could lose the merge.

Quarterly allocation		
Department	Budget	Owner
Research	12000	Ada
Operations	18000	Lin

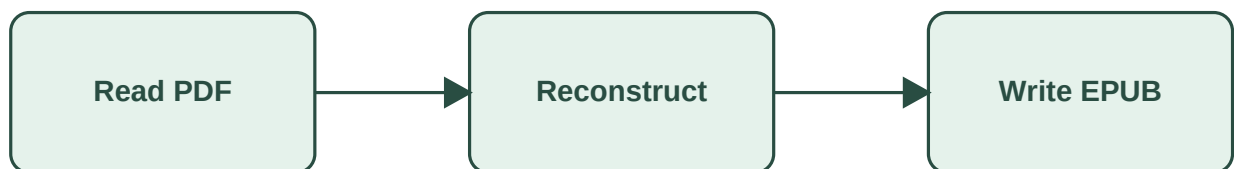

MERGED_END_MARKER. Text around the complex table should still be adjustable.

Equations and diagrams

Mathematical notation should preserve baselines, superscripts, and fraction bars.
The process diagram below must retain its arrows and labels.

$$x^2 + y^2 = r^2$$

$$f(x) = \frac{x + 1}{2x + 3}$$

DIAGRAM_END_MARKER. The diagram and formulas should appear once, with normal text continuing here.

Two columns, one reading order

LEFT_1. This paragraph belongs to the left column. Read every paragraph in the left column before starting the right column.

LEFT_2. This paragraph belongs to the left column. Read every paragraph in the left column before starting the right column.

LEFT_3. This paragraph belongs to the left column. Read every paragraph in the left column before starting the right column.

LEFT_4. This paragraph belongs to the left column. Read every paragraph in the left column before starting the right column.

RIGHT_1. This paragraph belongs to the right column. Read every paragraph in the left column before starting the right column.

RIGHT_2. This paragraph belongs to the right column. Read every paragraph in the left column before starting the right column.

RIGHT_3. This paragraph belongs to the right column. Read every paragraph in the left column before starting the right column.

RIGHT_4. This paragraph belongs to the right column. Read every paragraph in the left column before starting the right column.

A scanned page

A simulated scan

These words exist only inside an image.

Version 0.1 preserves this page visually.

OCR can be added after the layout engine
has been tested on real documents.

Original shapes	Stay in place

A slide should remain a slide

TEXT

Adjustable paragraphs

TABLES

Grid or visual fallback
